My brother, my hero

My brother Ralf just send me these pictures. While I'm bumming about on a boat, he designed and built an electrically assisted tricycle for our mum. From scratch. With suspension, motor, batteries, drive control, >100km range and a box for the shopping. Mobility for mum! (She has problems with balance and can't ride a bicycle and shouldn't drive a car) The tricycle Mark I. Mum on her first test drive. Bye mum. Happy shopping!

Hello Guy's

I was showing vacation pictures to one of my many , many cousin's. One of them is in U.S. Homeland Security and knows Columbia quite well . A word about Columbia. There is a not so good side and then there is a bad side of Columbia. This is "Not" P.R.that is protected by the U.S.A. Don't tell that to two of my brothers. She also suggest using this web site.

http://travel.state.gov/travel/cis_pa_tw/cis_pa_tw_1168.html

I am sure Germany has a site similar for you guy's but, i am sure that the French don't have a need of a site like that. Ha.Ha.
Best, Lou
